

## AJAX & JSON

find out the rockbands.json file to make a page with 2 dropdown lists, the 1<sup>st</sup> one is filled with the band and the 2<sup>nd</sup> one is filled with the artist after selecting a band from its dropdown list. Once the user selects an artist of the band; open his link

## **BONUS**

Make ajax request to consume the service of the following link  
“<https://reqres.in/api/users>”

And display email, first\_name, and last\_name fields in a table.
